Top Skills

EDA

Microsoft Power BI

Data Cleaning

Sara Allan

QA Engineer | Selenium, Python, API Testing (Postman), SQL | Data Analyst background (Power BI, Excel, ML) | Ensuring software quality through automated testing and data-driven insights

Palestinian Authority

Summary

computer systems engineer graduate from palestine polytechnic university, an ambitious person who are willing to put in the necessary effort, dedication, and perseverance to reach my objectives

Experience

GGateway

Data science and Machine learning

January 2026 - April 2026 (4 months)

Palestinian Authority

Completed an intensive Data Science & Machine Learning bootcamp, gaining hands-on experience across the full ML pipeline. Built a cardiovascular disease prediction model using XGBoost and Keras on 70,000+ patient records, and delivered a working prediction website as a team capstone project.

AHL Logics

QA Trainee

July 2024 - November 2024 (5 months)

Hebron, West Bank

Completed a hands-on QA internship covering the full software testing lifecycle, from manual testing to test automation. Performed manual UI testing on a real web application, documenting detailed bug reports with severity levels, expected vs. actual results, and reproduction steps. Automated test cases using Selenium and Python, and validated API functionality through structured API testing.

Built a To-Do List application in Python to strengthen clean code principles and design patterns.

Education

Palestine Polytechnic University

Bachelor's degree, Computer Systems Engineering · (2018 - 2023)
